   [ ] Yes  [ ] No  [ ] N/A If yes, list the Receiving Stream(s): 

ADDITIONAL OUTFALLS CAN ADDED USING SEPARATE ATTACHED PAGES.
ADDITIONAL PERMIT INFORMATION

1. Is the permittee capable of meeting the applicable effluent limits and conditions of the general permit? [ ] YES [ ] NO*
   * If the answer is NO, DO NOT submit the NOI for permit coverage.

2. Facility has Individual NPDES Permit: [ ] YES (Permit Number _____) [ ] NO

3. Disclosure Statement: Arkansas Code Annotated Section 8-1-106 requires that all applicants for the issuance or transfer of any permit, license, certification or operational authority issued by the Arkansas Department of Environmental Quality (ADEQ) file a disclosure statement with their applications. The filing of a disclosure statement is mandatory. No application can be considered complete without one. You must submit a new disclosure statement even if you have one on file with the Department. The form may be obtained from ADEQ web site at: http://www.adeg.state.ar.us/disclosure_stmt.pdf

CERTIFICATION

"I certify that, if this facility is a corporation, it is registered with the Secretary of the State of Arkansas."

"I certify that the cognizant official designated in this Application is qualified to act as a duly authorized representative under the provisions of 40 CFR 122.22(b). If no cognizant official has been designated, I understand that the Department will accept reports signed only by the Applicant. I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

**Purchase a Certificate of Good Standing for this Entity**

**Pay Franchise Tax for this corporation**
volume of the detention pond is roughly 600 gallons. In the original NOI, I had stated that we would be discharging 29,000 gallons. We ended up installing a smaller diameter of pipe than what I had thought so the total volume will only be 15,500 gallons. The stream is roughly 4500 feet away from where we will be discharging and the water would be flowing over pasture and through woods before entering the stream. Hope this answers all your questions!

Amanda

I know I keep asking you for more information that I should have just asked all at once in the beginning, but every time I think I’m finished with it, someone has more questions and concerns about the endangered species near the discharge point. I apologize that this keeps dragging out.

So...is it possible to let me know the volume of the detention pond that will be used for this discharge? Or an hourly discharge rate instead of MGD? We seem to need some more convincing that the water is actually going to be entering the stream at a slow rate that won’t affect the sensitive species nearby. Any information that would verify this (again) would be helpful.

Once again, I am really sorry about how long this is taking to get issued. I promise I’m bugging pretty much everyone around here about it!

Thanks,
Sarah

Yes, there will be a retention pond and a filter bag. They will also fit the end of the pipe with a diffuser so the water comes out slower.

Can you verify that the contractor will use a retention pond and filter bag with this discharge?
The location of this discharge is very close to a losing stream as well as some extremely sensitive species and the Department wants to make sure that this water will be discharged slowly.

Thanks,
Sarah

I think you are correct, it does seem to flow towards the Kings River. Usually the contractor will build a retention pond with hay bales and plastic lining, then let the water settle before it leaves the site. It will also be filtered with a filter bag as it leaves the pipe. If you need any more info to help the permit move along, please let me know. Can you give me a timeframe as to when it will be approved?

Subject: Cave Road Replacement project

Hey Amanda,

I just wanted to check with you about this project’s location. Based on the coordinates, which seem to match the maps, it looks like it will be discharging to tributaries of the Kings River. The NOI says it will go to tributaries of War Eagle Creek. Kings River is designated as an Extraordinary Resource Water, a Natural and Scenic Waterway, and is Category 5 impaired for beryllium, TDS, and DO so if it goes that direction it’s going to be reviewed by more people. I’m not saying it won’t be covered, I just know it will be looked at closely, so I wanted to make sure before I went forward.

Take a look at the coordinates and see what you think. Based on the location and the topo lines, it seems to me to really go towards the Kings River. (36° 9' 56.48” N, 93° 40' 27.86” W)

Let me know!

Thanks,
Sarah Cousins
